TO MOUNT ON FRONT OF SADDLEBAGS
1. Push plastic tab on bottom of pouch through the slot in the bottom of the saddlebag (arrow A). You may have to pry the slot open with a screwdriver to get the tab started in between the leather and plastic on the saddlebag the first time you install them. Then feed the ends of the D-ring straps through the slot in the back of the pouch (arrow B).

2. Push the pouch tab all the way in and pull the D-ring through the back of the pouch with the D-ring straps. It pulls through hard the first time you do it, but it gets easier as the leather around the slot softens up.

3. Push the latch through the D-ring… and all The way down

TO MOUNT ON REAR OF SADDLEBAGS
4. Pull the D-ring through the back of the pouch and latch down as in steps 1-3 but leave the plastic tab hanging out.
5. Push the end of the buckle strap (included with pouches) through the slot in the plastic pouch tab.
6. Hook the black hook on the end of the buckle strap into the hole in the bottom of the saddlebag.
7. Pull the strap as far as you can through the slot while pushing the end of the plastic tab towards the bottom of the saddlebag.
8. Pull tight and buckle the strap.
